

Technical Data Sheet

KC-822

Styrene acrylic emulsion for economic relieve paint
DESCRIPTION

KC-822 is styrene acrylic copolymer emulsion specially designed for exterior paint. This product shows excellent quality in waterproofing, alkali resistance, hardness and leveling property.

KC-822 is very suitable for the formulating of relieve paint with great performance in anti-yellowing.

Key features and benefits

- Perfect water and alkali resistance
- Perfect hardness and leveling property
- Perfect anti-yellowing property

Typical physical characteristics (not to be considered specifications)

Type	Styrene acrylic copolymer
Appearance	White emulsion
PH	8±1
Brookfield Viscosity (25°C, 4#60r, cps)	800-3000
Solid Content (%)	48±1
MFFT (°C)	34
Particle Size (µm)	0.1-0.2
Ionicity	Anionic

VERSION: 2.0
