

Technical Data Sheet

KC-629W

Bran-new vinyl acetate-acrylic latex for low odor interior paint

DESCRIPTION

KC-629W is new and environmentally friendly vinyl acetate-acrylic latex for interior paint. On the base of unique self cross-linked technology, it has the features of low odor and high performance, dispelling all weakness of the conventional vinyl acetate-acrylic latex. KC-629W is suitable for the formulation of high PVC emulsion paints which require excellent scrub resistance and comfortable odor

Typical physical characteristics (not to be considered specifications)

Type	Vinyl acetate-acrylic
Appearance	Milky white
PH (25°C)	5-8
Brookfield Viscosity (25°C, 4#12r, cps)	<1500
Solid Content (%)	52±1
MFFT (°C)	About 15°C
Particle Size (µm)	0.15-0.25
Ionicity	Anionic

STORAGE

Store in airtight container and avoid cold or high temperature. Suggestive normal storage temperature is 10-35°C. Period of validity is six months after the packing date.

NOTICE

Specific suggestion of working procedures and formula can be provided only after knowing customer's product applications and production facilities.
